

Uganda project

SDGs - 1,2,3,4,5,6,7,8,10,11,12,13,15,17

1 No poverty – the project clearly reduces poverty for the people involved in it.

2 Zero hunger – improved income enables people to be better fed and growing a wider variety of foods improves people’s diet

3 Good health and well being – a better diet improves people’s health and more income makes it easier to use medical services (get to clinics etc.)

4 Quality education – more people can afford school fees and the project itself educates people

5 Gender equality – the project is giving women’s groups and individuals like Anet opportunities to manage things and create change

6 Clean water and sanitation – there’s no specific mention but better incomes enable people to install water and build toilets

7 Affordable and clean energy – making fuel efficient stoves makes it possible for people to use less fuel (firewood or charcoal)

8 Decent work & economic growth – the project has created 55 jobs directly and has led to economic growth in the area

10 Reduced inequalities - by creating opportunities for women the project reduces inequality between men and women in the area. It does not change the inequality between the rural population in a country like Uganda and rich countries in any significant way.

Size Of Wales

SDG Links To Projects

11 Sustainable cities and communities – not a city of course, but the community is reducing the impact of climate change by planting trees and making their own area more able to cope with the impacts of climate change

12 Responsible consumption and production – the people in Mbale don't consume much but the coffee they produce is fair trade.

13 Climate action – planting trees absorbs CO₂ so contributes to reducing climate change.

15 Life on land – planting a diversity of trees provides' habitats for a variety of species. Encouraging bees helps plant diversity.

17 Partnership for the goals – the link between Wales and the Mbale area delivers this.

Wapichan project

SDGs - 1, 3, 4, 11, 12, 13, 14, 15, 17

1 No poverty – the project clearly reduces poverty for the people involved in it.

3 Good health and well being – the Wapichan’s sense of well-being depends on the well being of their land.

4 Quality education – the people are being educated with many skills to map and monitor their area and they are educating the young people in traditional knowledge and skills

11 Sustainable cities and communities – the community is reducing the impact of climate change by protecting the forest and making their own area more able to cope with the impacts of climate change

12 Responsible consumption and production – taking products from the forest in the way that the Wapichan do is sustainable

13 Climate action – protecting the forest which is a huge store of carbon contributes to reducing climate change.

14 Life below water – they are trying to prevent the pollution from mining that has killed everything in some rivers

15 Life on land – protecting the forest also preserves biodiversity.

17 Partnership for the goals – the link between Wales and the Wapichan achieves this

Zimbabwe

SDGs - 1,2,3,4, 5, 8, 10, 11, 12, 13, 15, 17

1 No poverty – the project clearly reduces poverty for the people involved in it.

2 Zero hunger – The project is providing more and better food for a lot of people in the community

3 Good health and well being – being better fed improves people’s health and more income makes it easier to use medical services (get to clinics etc.)

4 Quality education – more people can afford school fees and the project itself educates people

5 Gender equality – the project is giving women’s groups and individuals opportunities to manage things and create change

8 Decent work & economic growth – the project is producing more food in the area and more stable incomes

10 Reduced inequalities - by creating opportunities for women the project reduces inequality between men and women in the area. It does not change the inequality between the rural population in a country like Zimbabwe and rich countries in any significant way.

11 Sustainable cities and communities – not a city of course, but the community is reducing the impact of climate change by reducing deforestation, planting trees and making their own area more able to cope with the impacts of climate change

Size Of Wales

SDG Links To Projects

12 Responsible consumption and production – growing organically and encouraging things like bee keeping is sustainable

13 Climate action – planting trees absorbs CO₂ so contributes to reducing climate change.

15 Life on land – planting a diversity of trees provides' habitats for a variety of species. Encouraging bees helps plant diversity.

17 Partnership for the goals – the link between Wales and the Kariba area delivers this.

Ogiek in Kenya

SDGs - 1, 3, 4, 11, 12, 13, 15, 17

1 No poverty – the project clearly reduces poverty for the people involved in it.

3 Good health and well being – the Ogiek’s sense of well-being depends on being able to live on their land.

4 Quality education – the people are being educated with skills to map and monitor their area and they are educating the young people in traditional knowledge and skills

11 Sustainable cities and communities – the community is reducing the impact of climate change by protecting the forest and making their own area more able to cope with the impacts of climate change

12 Responsible consumption and production – taking products from the forest in the way that the Ogiek do is sustainable

13 Climate action – protecting the forest which is a huge store of carbon contributes to reducing climate change.

15 Life on land – protecting the forest also preserves biodiversity.

17 Partnership for the goals – the link between Wales and the Ogiek achieves this

DRC (Democratic Republic of the Congo)

SDGs - 1, 2, 3, 4, 5, 7, 8, 10, 12, 13, 15, 17

- 1** No poverty – the project clearly reduces poverty for the people involved in it.
- 2** Zero hunger – The project is providing more and better food for a lot of people in the community
- 3** Good health and well being – being better fed improves people’s health and the fuel efficient stoves makes homes healthier
- 4** Quality education – the project itself educates people
- 5** Gender equality – the project is improving women’s lives with the stoves (less time collecting firewood) and the loans.
- 7** Affordable and clean energy – making fuel efficient stoves makes it possible for people to use less fuel (firewood or charcoal)
- 8** Decent work & economic growth – the project is producing jobs and making farmers lives more productive
- 10** Reduced inequalities - by creating opportunities for women the project reduces inequality between men and women in the area. It does not change the inequality between the rural population in a country like the DRC and rich countries in any significant way.

Size Of Wales

SDG Links To Projects

12 Responsible consumption and production – growing organically and encouraging things like bee keeping is sustainable

13 Climate action – the community is reducing the impact of climate change by reducing deforestation

15 Life on land – reducing deforestation and controlling poaching helps biodiversity in the forest.

17 Partnership for the goals – the link between Wales and the DRC area delivers this.

Kenya coast

SDGs - 1, 2, 3, 4, 5, 7, 8, 10, 11, 12, 13, 14, 15, 17

1 No poverty – the project clearly reduces poverty for the people involved in it.

2 Zero hunger – The project is providing more and better food for a lot of people in the community

3 Good health and well being – being better fed improves people’s health. Reducing air pollution in homes makes people healthier.

4 Quality education – the project itself educates people

5 Gender equality – the project is improving women’s lives with the stoves and lamps and makes it easier for girls to study.

7 Affordable and clean energy – the fuel efficient stoves and solar lamps make it possible for people to use less fuel (kerosene, firewood or charcoal)

8 Decent work & economic growth – the project is producing jobs and making farmers lives more productive. The loans help people to develop an income.

10 Reduced inequalities - by creating opportunities for women the project reduces inequality between men and women in the area. It does not change the inequality between the rural population in a country like Kenya and rich countries in any significant way.

11 Sustainable cities and communities – not a city of course, but the community is reducing the impact of climate change by reducing

Size Of Wales

SDG Links To Projects

deforestation and planting trees

12 Responsible consumption and production – the project is encouraging sustainable growing in lots of ways

13 Climate action – planting trees absorbs CO₂ so contributes to reducing climate change. The use of the stoves and solar lamps reduce carbon emissions.

14 Life below water – the work with farmers on the rivers has improved the state of the rivers

15 Life on land – planting a diversity of trees provides habitats for a variety of species. Encouraging bees helps plant diversity.

17 Partnership for the goals – the link between Wales and the Kenya coast area delivers this.

Peru & the Wampi

SDGs - 1, 2, 3, 4, 5, 8, 12, 13, 14, 15, 16, 17

- 1** No poverty – the project reduces poverty for the people involved in it by increasing the ways they can make a living.
- 2** Zero hunger – The project improves people’s income and their ability to be better fed
- 3** Good health and well being – reducing pollution in the rivers makes sure that people don’t suffer from that pollution
- 4** Quality education – the project itself educates people, particularly in skills of using GPS and radio production.
- 5** Gender equality – the Wampi themselves say they want to empower the youth and women
- 8** Decent work & economic growth – the project is making farmers lives more productive.
- 12** Responsible consumption and production – the project is encouraging sustainable growing in lots of ways
- 13** Climate action – planting trees and protecting the forest absorbs CO₂ so contributes to reducing climate change.
- 14** Life below water – stopping gold mining and opposing oil and gas exploration protects the rivers

Size Of Wales

SDG Links To Projects

15 Life on land – protecting the forest benefits all the biodiversity in it

17 Partnership for the goals – the link between Wales and the Wampis delivers this.
